

## DIEPPE TRAIL SYSTEM

DIEPPE, NB • 2007-2014

Since 2007 BDA Landscape Architects have assisted the City of Dieppe with the design of several trail projects. Many of the trails that have been constructed are neighborhood connections linking multi-use trails within residential areas to key points of interest such as schools, parks and larger trail systems.

In January 2012, BDA was awarded a contract to provide an assessment of portions of proposed route for hiking and biking connection the boundary of Dieppe and Memramcook with Fox Creek and the City of Dieppe. BDA also produced a working drawing package and provided tendering services for the first section of trail in 2013. This section expanded the existing Riverfront trail to Dover Road and included several boardwalk spans through marsh and over Petitcodiac River tributaries.
