## HEATHER MOYSE HERITAGE PARK    SUMMERSIDE, PE • 2008-2011

BDA prepared design plans, construction documents, obtained permits, and provided construction supervision for two major park projects in Summerside between 2008-2011. The projects include the creation of a storm water pond wetland feature, washroom pavilion, trails, boardwalks, bridges, and picnic areas. The plan also includes a planting scheme that is an interpretive botanical arboretum featuring the native trees of Prince Edward Island. All work was done in compliance with the Prince Edward Department of the Environment.
